Summary of offer	<b><i>Export/Cooperation/Representation: Oil-on-Water detection and monitoring systems for environment protection</i></b>
<p><b><u>Description:</u></b></p> <p>A privately-owned business, based in Turkey, provides advanced solutions for the early detection and monitoring of oil leaks and oil spills in critical facilities.</p> <p>The company manufactures a unique product line which aims at detecting the presence of hydrocarbons on water in different facilities such as oil refineries, seaport authorities, water municipalities and power generation facilities, and to send alerts to its end users in a critical time. That is in order to prevent further negative consequences of the leak on the environment.</p> <p>The products use a special technology which enables the detection of small oil leaks and monitoring the thickness of the oil layer as it grows. Emulsions of oil in water can also be detected.</p> <p>Following the detections &amp; monitoring process, the system will alarm the end users and will enable the operators to stop the process. This unique solution is significant to the protection of the environment and can save high costs to the end users, obligated to regulation concerning environmental protection, by minimizing the damage.</p> <p>The products are manufactured in Turkey and exported to many different countries around the world. The products have an excellent reputation among its users.</p> <p>The company is constantly looking for additional sales partners with relevant experience and access to potential end users and markets, for selling and giving technical support in industries of Oil &amp; Petrochemical, Power generation &amp; distribution, Transportation, Manufacturing, Water. In short, any place where it is necessary to monitor leaks/spills of hydrocarbons. Our commercial model with our distributors is very easy, based on mutual confidence as we believe that the success of our partners is our success.</p> <p><b><u>Target Industries:</u></b> Oil &amp; Petrochemical, Power Generation &amp; Distribution, Transportation, Manufacturing, Water. The products are applicable to any place where it is necessary to monitor leaks/spills of hydrocarbons.</p>	
<b>Potential Partners</b>	The company offers the products mainly to industrial end users worldwide either directly or through a network of distributors. The company is looking for additional sales partners with relevant experience and access to potential end users and markets, for selling and giving technical support for the products.
